

## Vegas Table Limit Sign

The eye catching Vegas LCD Table Limit Sign combines WiFi technology with elegant design to create a powerful promotional tool

### Physical Attributes

- Full color 7" LCD display
- Display can be between 1 and 6 separate zones
- Each zone is capable of video, static images, slideshow or scrolling text, which allows the removal of all other signage and unclutters the table
- Sturdy 9" or 5.5" bolt pedestal table-mount system
- Compatible with existing casino digital sign systems

### LED-lit Custom Faceplate

- Custom designed illuminated faceplate creates an elegant and striking look, enhancing the casino
- Each faceplate is printed on acrylic and laser cut to any shape, size and color
- Easily swapped out for a new faceplate to match a new decor or rebranding
- Options include non-illuminated black or gold frame

### Content and Schedule Preparation

- Graphic content and scheduling is assembled on a Mac or PC based computer using complimentary software from Carmanah
- Content/schedule is saved (as a single file) and uploaded to the Vegas either wirelessly or via a USB flashdrive
- Each Vegas is a network enabled IP device, updates can be done remotely - head office can transmit the content/schedule file to each Vegas on a casino floor from anywhere in the world, allowing both marketing control and fresh, timely promotions
- Content/schedule updates can be done remotely, through Wifi or the buttons

### Digital Craps Table Limit

- Has the same features as all Vegas LCD Table Limit signs, except mounting: two craps table bolts
- Non-lit black frame (lit faceplate not available)
- For content selection (including min/max) at the pit, a local WiFi-enabled Mac, PC or mobile device is required
